DO NOT induce vomiting unless directed to do so by a physician or poison control center. Take victim immediately to hospital.
Most important symptoms and effects, both acute and delayed	: Effects are immediate and delayed. Effects are dependent on exposure (dose, concentration, contact time). Symptoms may include blistering, irritation, burns, and pain. Chronic effects are delayed and symptoms may not be observed during an exposure. Causes severe skin burns and eye damage. Review section 2 of SDS to see all potential hazards. Suspected of causing cancer.
Notes to physician	: Treat symptomatically. Symptoms may be delayed.
